ROMA ACCESS TO ADEQUATE MINIMUM INCOME SCHEMES IN BULGARIA, THE CZECH REPUBLIC, HUNGARY, ROMANIA, AND SLOVAKIA

A contribution to reducing Roma poverty and social exclusion

This synthesis report was drafted by Amana Ferro, Senior Policy Adviser with the European Roma Grassroots Organisations (ERGO) Network, based on an extensive data collection exercise among the ERGO Network national membership, carried out between April and September 2021. Researchers in Bulgaria (Integro Association), the Czech Republic (Life Together), Hungary (Socfactor Consulting), Romania (Policy Center for Roma and Minorities) and Slovakia (Roma Advocacy and Research Centre) have provided direct evidence and national case studies.

**EU action is needed: a Framework Directive, a European Year,
FIXXIV GSRXVSP SJ)9 JYRHW**

As Member States appear reluctant to make the necessary changes on their own, more impetus should be given from the European level, for example through a Framework Directive for Adequate Minimum Income or a new European Year against Poverty.

INTRODUCTION

Rationale

In a cash-based economy, providing people with adequate financial resources is a necessary pre-requisite for fighting poverty and social exclusion, as well as for enabling individuals to reach their full potential and to access rights and opportunities on the labour market and in society.

Access to adequate social protection when income from paid employment is unavailable is also a cornerstone of the European Social Model and our welfare states. The EU Council Recommendation of 24 June 1992 on Common criteria concerning sufficient resources and social assistance in social protection systems clearly urges Member States "to recognize the basic right of a person to sufficient resources and social assistance to live in a manner compatible with human dignity as part of a comprehensive and consistent drive to combat social exclusion." This commitment is reaffirmed in the EU Active Inclusion Recommendation (2008) and the European Pillar of Social Rights (2017), the compass for Europe's recovery.

Minimum income is a social protection benefit [illegible] a cash [illegible] is transferred by the State to individuals in order to protect them from poverty and social exclusion. It is called a "last-resort" safety net. It is:

- **Means-tested:** It is not automatically available to all (unlike the universal basic income). People must apply for it and pass a means test, which aims at demonstrating that their combined income from all sources is less than a pre-defined threshold.
- **Non-contributive:** Unlike unemployment benefits or pensions employees pay social security contributions during their working lives, minimum income schemes do not require prior contributions and through general taxation.
- **Conditional:** Most countries require minimum income recipients to engage with labour market activation programmes, to be available to take up work when offered, and/or to be willing to perform community services.

With Europe's Roma experiencing poverty rates of over 80% and employment rates of only 43%,

access to adequate social protection, including minimum income schemes, is fundamental in order XS KYEVERXII HMKRMûIH lives

and to enable the Roma to fully participate in the labour market and society.

With this report, we aim to provide data and strong evidence of Roma concerns, as well as good practices for improving access to and take-up of social protection and minimum income in selected Member States. The aim of this research is to inform better delivery of the EU Roma Strategic Framework on Equality, Inclusion and Participation, particularly the cross-cutting objective on reducing Roma poverty, as well as of the Action Plan for the European Pillar of Social Rights. It will equally feed into advocacy around the upcoming Council Recommendation on Minimum Income, foreseen for 2022, and around achieving an EU Framework Directive on Adequate Minimum Income.

Methodology

Between April and September 2021, ERGO Network researchers in Bulgaria (Integro Association), the Czech Republic (Life Together), Hungary (Socfactor), Romania (Policy Center for Roma and Minorities), and Slovakia (Roma Advocacy and Research Centre) have prepared in-depth national case studies about Roma access to minimum income and social protection in their country.

In **Bulgaria** WYVZI]W [IVI GSRHYGXIH PSGEXMSRWx 7LYQIR /EW /VMZSHSP &SXIZKVEH ERH ent parts of Bulgaria, including municipali- XMIW SJxHMJJIVIRX WM^I population. This was complemented by ExHIWO WXYH]xSR I\MWX ulations in Bulgaria, relevant to the topic, as well as by additional research and analysis of existing reports on Bulgaria's minimum income schemes and social assistance policies as a way to combat poverty, and semi-structured interviews [MXL 6SQExSJxHMJJIVIRX EKIW

Access Bulgaria's national case study on Roma access to adequate minimum income here.

In the **Czech Republic**, researchers drew on PSRK I\TIVMI social workers from the Child Protection Hnízdo Team of Life Together. Additional desk research and governmental data was also used. The report was submitted for comments to Public Employment Service S¾GMEPW FIJSVI ¼REPMWMRK

Access the Czech Republic's national case study on Roma access to adequate minimum income here.

In **Hungary**, a combination of desk and empirical research was used, predominantly based on the former. While there is some literature and data on the Hungarian minimum income, there are very few sources concerning Roma access. Relevant information on these aspects was obtained in close consultations with researchers, practitioners and, where possible, the Roma concerned.

Access Hungary's national case study on Roma access to adequate minimum income here.

In **Romania**, two main methods were used. Desk research included materials on the minimum income, studies on numbers and impact developed by Romanian researchers, data from the Labour Ministry, and data collected by NGOs. The second source of information (mostly about dif- ¼GYPXMIW MR XLI ¼IPH VIPEXIH XS EGGIWWMRK XLI QMRMQYQ MRGSQI FIRI¼X [IVI TIS- ple from the Ferentari neighbourhood of Bucharest. Ferentari is an urban ghetto; the information received applies to all types of poor communities. What matters here is less the geography and more the economic situation of the potential FIRI¼GMEVMIW

Galina Topalova MW ER I\TIVX E¾PMEXIH with the **Integro Association (Bulgaria)**, a member of ERGO Network since its inception. The association was established in October 2002. Its mission is to promote respect and equality for Roma. All activities are based on developing active citizenship in Roma communities and ensuring adequate representation of Roma people at all levels of decision making. The organisation has considerable experience in addressing anti-Roma attitudes, issues of social exclusion and human rights violations. The team of Integro works on creating conditions for dialogue and co-operation with local authorities and national institutions in Bulgaria. This includes empowerment of individuals and groups both for leadership and for grassroots mobilization. One of the focuses of the team is empowering Romani women and youth. Integro maintains and supports a sustainable and wide-spread network of local community activists all over the country, and it facilitates the cooperation of Roma activists with local authorities and NGOs. The association provides capacity building opportunities for all stakeholders.

The organisation focuses on supporting Roma community development through an inclusive approach, based on active cooperation between minority and majority population. The most important activity of RARC is educating young people and improving the social status of disadvantaged groups. The Centre uses qualitative research methods in order to obtain relevant data as support for policy and public discourse change. The organisation is based in Skalica, where it has built outstanding partnerships with various local actors. Aside that, the Centre is also involved in national and international activities, including as a member of the ERGO Network.

SNAPSHOT OF THE SOCIO-ECONOMIC SITUATION OF THE ROMA IN FIVE COUNTRIES

All five countries participating in this researc Roma residents in Europe In all five countries **Roma communities are (among) the hardest hit population groups** in what concerns poverty, unemployment, exclusion, antigypsyism, and very poor overall socio-economic indicators. This pre-existing state of dire inequality was significantly worsened by the impact of and associated measures, on the backdrop of increased antigypsyism. See also ERGO Network's research study on the impact of Covid-19 on Roma communities here.

In **Bulgaria**, the number of people who identified as Roma in was (4.4% of the population), while estimates by the European Commission point rather to 750 000 (10% of the population), and unofficial sources to numbers twice as high. The Fundamental Rights Agency found that, in 2017, 86% of the Roma were at risk of poverty and social exclusion, compared to 22% of the majority population. Only 38.8% of Roma are economically active, while only 14.4% receive a pension, as a result of a lifetime record of unemployment and precarious work with no employment rights or social security. The prevalence of younger age cohorts within the Roma population indicates shorter life expectancies, combined with higher birth rates. Most Roma live in segregated neighbourhoods, facing dire living conditions and daily antigypsyism. Most Roma children attend segregated schools, with poor attendance and completion rates. Most Roma are excluded from employment, income, rights, and services, on the backdrop of anti-Roma moods and anti-Roma discriminatory actions.

In the **Czech Republic**, approximately 262 000 people are Roma, in a population of approximately 10.65 million inhabitants (2019). More than half are so-called integrated Roma. The remaining part (approximately 110 000 people) can be considered socially excluded or at risk of social exclusion. Of these, approximately 73 800 people are also at risk of income poverty and material deprivation and live in households with low work intensity. Due to the unfavourable social situation, people do not have the opportunity to participate in everyday life and are isolated on the margins. Poverty and social exclusion of Roma are also significan discrimination and antigypsyism. Socially excluded localities in the country are characterised by spatial exclusion, low level of education difficult acces vices, to decent employment opportunities and to housing lack of fin poor hygiene and sanitation, addiction and substance misuse, and reduced socio-cultural competences.

In **Hungary**, the last census of 2011 counted 315 583 people identifying as Roma. However, there are estimated to be around 7-800 000 Roma living in Hungary, about 7-8% of the population. They are significantly younger have higher birth rates and a life expectancy 10 years lower than that of the majority. Roma populations are mostly concentrated in the North-East and in the South-West of the country. About half of them live in small villages, the other half live in urban slums in Budapest and other cities. The Roma are three times more exposed to poverty: in 2017, 75.6% of Roma were at risk of poverty and social exclusion, versus 25% of non-Roma. The Roma employment rate is significantly lower at 45%, compared to almost 70% for the general population. The unemployment rate of the Roma is 18.5%, more than four times the rate of the non-Roma population (3.8%.) The causes of their social and economic marginalisation are low educational attainment, typically low-paid employment, poor housing conditions and poor health, creating a vicious cycle of deprivation and exclusion. All of these are reinforced by antigypsyism, which is higher than the European average – but similar to other Eastern European countries - and through frequent institutional segregation.

In **Romania** the official number of Roma inhabitants according to the 2011 census was 621 573, while estimates about the actual numbers point to 1.5 to 2 million Roma. 80% of Roma live under the poverty line, as recognised by the Government in its National Recovery and Resilience Plan (2021). The same document points to abysmal living conditions, with 68% of Roma not having access to running, drinking water, while 79% lacked indoor plumbing and facilities such as a bathroom or a toilet. The draft National Roma Framework 2021-2027 of the Romanian Government notes that only 25% of young adults (over 16) are engaged in an income-generating activity, while the employment rate is only 34% of Roma men and 16% of Roma women. Equally, 63% of young Roma (16-24) are not involved in employment, education, or training (NEETs). 60% of Roma rural communities are clas
communities. Working abroad is the main source of income for 5% of Roma.

In **Slovakia**, according to a study by the Central European Institute for Labor Research (CELSI), most of the almost half a million Roma live in poverty and face social exclusion, at a rate of 87%, compared to 13% of the general population. Almost half (48%) of Roma over the age of 16 are unemployed according to sample surveys and only one in
employment or trade as their main economic activity. These communities are also located in less developed regions. More than 3/4 of Roma have only completed primary education, and only 24% of children aged 3-6 attend kindergarten. While in the general population the median equivalent disposable income for a one-member household is 7 462 euro per year, in marginalized Roma communities it is only 2 336 EUR per year. About 17% of people live on less than 3.8 EUR per day. 47% of households are in material need (compared to 4% of households within the general population), while two thirds of households have difficulty c
living costs. Hence, most Roma experience economic hardship and are denied access to equal opportunities for quality education, a healthy living environment, a decent job and a meaningful life.

BRIEF OVERVIEW OF MINIMUM INCOME SCHEMES IN FIVE COUNTRIES

0IKEP JVEQI[SVO

.R EPP ûZI GSYRXVMIW reviewed, a system of social assistance of last resort is in place. In all countries, this FIRIûX MW RSR GSR XVMFYXMZI ERH QIERW tested, signifying that it can be accessed only upon proving that combined income from other sources does not exceed E TVI HIXIVQMRIH threshold, along side several other conditions which are reviewed below.

In **Bulgaria**, the social assistance system MW PIKEPP] HI¼RIH F] XLI 7SGM Act and the Regulation for its implemenXEXMSR 8LIWI HI¼RI XLI IRXMX minimum of means to ensure the satisfacXMSR SJ ˆFEWMG RIIHW‰ HI¼R food, clothing, and housing according to the socio-economic development of the country. The regulatory framework is comprehensive and fragmented, going beyond the above stated Act and including other pieces of legislation (like the Integration of People with Disabilities Act, the Family Allowances for Children Act, Act on :IXIVERW SJ ;EVW IXG

In the **Czech Republic**, assistance in material need is regulated by Act No. 111/2006 Coll., The Act on Assistance in Material Need, as amended. The subsistence and existential minimum are regulated by Act No. 110/2006 Coll., The Subsistence and Existential Minimum Act. These minima are thresholds considered necessary to provide for basic necessities for those without any other source of income. The subsistence minimum is used for those who show a willingness to seek employment, while the existential minimum applies to any citizen of the country over 18 years of age who is unable to provide for themselves and does not engage in job seeking activities.

In **Hungary** XLI WS GEPPIH ˆFIRI¼X JSV TIV sons of active age” is regulated by Act III of 1993 on Social Administration and 7SGMEP &IRI¼XW ERH 6IKYPEXMSR on the detailed rules for claiming, estab- PMWLMRK ERH XLI TE]QIRX SJ WSGMEP FIRI¼XW in cash and in kind. It purports to ensure minimum standards of living for people of active age who are not employed, whose household members own no property, and who have a low monthly income. There EVI X[S X]TIW SJ GEWL FIRI¼XW SRI JSV people suffering from health problems or taking care of a child and therefore unable to work, and an employment substituting FIRI¼X JSV TISTPI [LS EVI EFPI XS [SVO

In **Romania**, the minimum income scheme has been introduced by Law no. 416/2001 ERH QSHM¼IH XMQIW PEWXP] MR 2018. Since 2016, a new law foresees the replacement of the minimum income scheme with the minimum income for inclusion, but this is yet to be implemented.

In **Slovakia**, minimum income is called “assistance in material need” and it is a right enshrined in Art. 39 (3) of the Constitution. The level of assistance in material need depends on the composition of the household and on meeting various conditions. The aim is to ensure a minimum income that can maintain basic living conditions for those unable to secure their income. It is based on a person’s income falling below amounts WTIGM¼IH MR XLI 0MZMRK 1M below), which were last established by the Measure of the Ministry of Labor, Social Affairs and Family of the Slovak Republic No. 174/2020.

%HIUYEG] SJ XLI QMRMQYQ MRGSQI WGLIQIW

-R EPP FYX SRI '^IGL 6ITYFPMG SJ XLI ¼ZI GSYRXVMIW V **schemes are deemed** **EX MREHIUYEXI PIZIPW** compared to the actual cost of living, the national poverty lin XLI EFMPMX] SJ XLI FIRI¼X XS IJJIGXMZIP] XEOI VIGMTMIR RM¼IH PMZIW

Levels of minimum income schemes are set function of national reference amounts or indexes (with different names in each country), which are supposed to determine the minimum amount needed to cover basic needs. However, these **references are often MREHIUYEXIP] WIX VIWYPXMRK MR ZIV] PS[QSRXLP] EQSY** These indexes are mostly not calculated based on reference budgets and are also not adequately updated according to the real cost of living. As a consequence, the purchasing power of minimum income recipients is very low in many countries.

In **Bulgaria**, the legal reference for determining access to social assistance is the Guaranteed Minimum Income, required to cover basic needs. Its amount is 75 BGN in 2020 (approximately 38.4 EUR) per month per person. The Guaranteed Minimum Income is determined annually by the Council of Ministers, “according to XLI WXEXI…W ¼RERGMEP EFMPM ure that takes as key indicator sustainabil- MX] SJ TYFPMG ¼RERGIW VEXLI of the scheme. There is also little change over time: for 2017, it was the equivalent of 33 EUR, while for 2020-2021 it is 38.4 EUR per person per month.

The Differentiated Minimum Income is calculated by multiplying the Guaranteed 1MRMQYQ -RGSQI F] ER MRHMZMHYEP GSI¾GMIRX XEOMRK MRXS EGGSYRX EKI LIEPXL condition, household composition and social status. This differentiated scheme is used to determine who is entitled to tar- KIXIH SV QSRXLP] FIRI¼XW HITIRHMRK SR the income of the household. For example, people living alone aged over 75 or 65 are entitled to 165% or 145% of the guaranteed minimum income, respectively, while people living alone aged up to 65 receive only 73% of the guaranteed minimum income. Several other percentages are foreseen for a wide number of categories. It is thus apparent that most recipients are expected to live on an amount lower than 38.4 EUR a month.

%ROE MW E]IEV SPH 6SQE [SQER [LS [SVOW HE]W E Q VIGIMZI &+2 WSGMEP EPPS[ERGI VSYKLP])96 TIV 7LI GPIERW XLI WXVIIXW ERH TEVOW MR XS[R 8LMW WSGM ERGI MW JEV JVSQ FIMRK IRSYKL JSV WYFWMWXIRGI 8LI **family engages in informal work to make ends** QIIX 7LI XLMROW XLEX SRP] SPHIV TISTPI WXMPP **apply for minimum income, because most others feel it is not worth it for such a small** EQSYRX 7LI LIVWIPJ SRP] ETTPMIH MR SVHIV **to be eligible for the targeted heating allowance, as she needs to buy wood** HYVMRK XLI [MRXIV QSRXLW

:IPMRKVEH &YPKEVME

In the **Czech Republic**, the reference JSV GEPGYPEXMRK XLI FIRI¼XW EJJSVHIH to those in material need are based on the existential minimum of 2 490 '>/)96 TIV QSRXL JSV XLSWI inactive) or that of the subsistence QMRMQYQ SJ x '>/)96 TIV month (for those seeking employment). 8LI PEXXIV HIGVIEWIW XS '>/ EUR) for second and subsequent people in the same household, with differentiated additional amounts for dependent children of different ages. The living allowance is calculated as the difference between a person's (or household's) income and the applicable existential / subsistence minimum, respectively. An additional housing allowance and extraordinary immediate assistance are also available.

Overall, the system is relatively generous, TVSZMHMRK VSYKLP] ER E (5 EUR) per day per recipient. However, XLI EQSYRX SJ GSRXVMFYXMSRW ERH FIRI¼XW change frequently, as well as the relevant PIKMWPEXMSR [MXL WMKRM¼GERX GLERKIW SGGYV ring especially before elections. The level of the existential minimum is purposely very low, as it is designed to motivate people to actively seek employment. 35-60% of the living allowance for those in material need is paid in the form of vouchers, which can only be used for groceries in designated stores. Since most recipients SJ WSGMEP FIRI¼XW TE] VIRX SV YXMPMXMIW SYX of their subsistence allowance, they are forced to sell the vouchers illegally at a much lower price.

In **Hungary** XLI EQSYRX SJ XLI FIRI¼X JSV those unable to work depends on the size, composition, and income of the family. The maximum amount is 48 795 HUF, or 137 EUR (90% of the net minimum wage for public works) and the minimum 25 995 HUF, or 73 EUR per month in 2020. 8LI FIRI¼X JSV XLSWI EFPI XS [SVO MW ¼\IH equal to 80% of the minimum old-age pension, namely 22 800 HUF, or 64 EUR per QSRXL 8LI EQSYRX SJ XLI PEXXIV FIRI¼X has remained unchanged since 2012.

8LIVI LEW FIIR RS S¾GMEP GEPGYPEXMSR SJ the subsistence minimum since 2015, while most social provisions are tied to the arbitrarily set level of the statutory minimum for old-age pensions, which is unchanged since 2008. According to current research, in 2019 the average value of the subsistence minimum per consumption unit was 101 398 HUF (300 EUR) per month, while the value of the food basket for an active adult was 28 167 HUF (81 EUR) per month. The subsistence level of an average household consisting of two persons of active age and two children was calculated at monthly 294 055 HUF (840 EUR). It is clear that the amount of XLI QMRMQYQ MRGSQI MW WMKR than the minimum subsistence level. This is coupled with a loss of purchasing power HYI XS MR½EXMSR

In **Romania**, minimum income entitlements are calculated according to the Reference Social Index, which is only 500 RON (approximately 100 EUR). This is not based on a reference budget methodology or actual needs. The value of the minimum income amount is calculated function of the number of people in a household, by multiplying this index by a given coef¼GMIRX [LMGL MW MXWIPJ ZIV one person (142 RON), 0.510 for two people (255 RON), 0.714 for three people (357 RON), 0.884 for four people (442 RON), ERH JSV ¼ZI TISTPI 63 additional 0.073 is added for each additional person.

There was an attempt to gradually bring the Reference Social Index up to 1200 RON but, while the Parliament adopted the change MR MX [EW RSX VEXM¼IH F] The European Commission Country Report for Romania in 2020 emphasised the problem of a very low Reference Social Index in relation to poverty reduction. As the level of minimum income remained unchanged since 2008, and considering the evoluXMSR SJ TVMGIW ERH MR½EXM of goods and services one can purchase actually decreased. In September 2008, the Friedrich Ebert Foundation calculated a minimum monthly basket for a family of 2 adults and 2 children at the level of 6 762 RON, while for September 2020 it has been calculated at 7 278 RON. This is many times over the amount of 442 RON foreseen for such a family based on the Reference Social Index. For the minimum income to cover minimum expenses of a family, it should be increased by 16 times. According to the Law 225/2021, the Index will be adjusted every year (March), function of the inflation rate calculated for the previous year.

In **Slovakia**, the reference is the Living
